选项

+ 添加选项

+ 添加「其他」项

*Add Option

*Add "Other" Option

- Interaction varies slightly between question types
- All input fields have gray borders; selected fields are blue with a blinking cursor
- Clicking delete triggers a confirmation prompt to prevent accidental deletion

不同意

Disagree

逻辑

不好确定

Not sure

*03

选择此项的原因是

Reason for selecting this option

趣味较少

Not engaging enough

互动太少

Not interactive enough

例题太难

Practice examples are too difficult

多选

*Logic

逻辑

This question will only appear if the user selects "Disagree" for question 02: "I am satisfied with the lead instructor this season"

If a question should only appear based on certain answers
e.g., if the user selects "Disagree", the next question asks "Why do you disagree? ",
you can configure "Option Logic"

Each option can have a logic block assigned

Only single-choice questions support logic settings

Once set, options with logic are marked with a logic icon and show a tooltip:
"Selecting this option will trigger question xxx"

Questions with logic will display a note:
"This question will appear if question X = option Y"
